Techenomics boosts global capacity to analyse more than 750,000 samples annually

‘Supporting Engineering Excellence, One Sample at a Time’

In a significant expansion in its operational capacity, Techenomics International, your partner in lubrication reliability, now has the capability to analyse more than 750,000 fluid samples annually.

With a new laboratory development in Newman in Western Australia’s Pilbara region, one in the pipeline in Queensland, Australia, as well as enhanced operations in Mongolia and Indonesia, Techenomics has been able to boost capacity to meet growing demand.

CHRIS ADSETT
CEO OF TECHENOMICS

This comes as the company, which ‘Supports Engineering Excellence, One Sample at a Time’, reaffirms its commitment to faster turnaround times and localised services.

“Our continuous investment in infrastructure allows us to meet the growing demands of global clients, including in Australia, Indonesia and Mongolia,” said Techenomics CEO Chris Adsett.

“These expansions ensure we remain at the forefront of proactive condition monitoring, supporting industries with reliable, data-driven insights.”

Techenomics fluid sampling is a key aspect of its total fluid management services which not only assist operators in the mining industry optimise equipment to improve productivity and minimise costs, but any operators who use lubricants in mechanical equipment, including in the transport, rail, marine, agricultural and industrial sectors.

Enhanced laboratory capacity in key mining and industrial areas has empowered Techenomics to increase the number of samples analysed with the localised services throughout Australia, Indonesia and Mongolia providing operators with the right maintenance advice to optimise their operations.

Along with increasing capacity, Techenomics commitment to keeping pace with technology ensures that clients receive appropriate data and advice as quickly as possible with turnaround times being reduced in the drive toward real-time analysis in conjunction with the adoption of improved sensors and the company's unique Blue Oceans software system.
